WINTER NEWSLETTER 2018

WE'RE CELEBRATING OUR 35th ANNIVERSARY WITH A WHOLE NEW LOOK!

Back in 1982, Douglas Kimlin founded a small family business called Kimlin Propane. Over the next 35 years, we grew to service seven Mid-Hudson counties. But we still remain family-owned, family-operated and dependable. Meanwhile, our services have expanded to include heating oil, commercial fuels and service and maintenance.

To commemorate our 35th year in 2017, as well as our growth and diversification, we gave ourselves an anniversary makeover: we're now known as Kimlin Energy Services and have introduced a new logo to reflect new beginnings, while keeping our traditional commitment to reliable, neighborly service.

WINTER STORM SAFETY TIPS FOR FUEL STORAGE

Snow and ice can cause serious damage to your fuel storage system. Please follow these steps to keep your propane and oil storage systems safe, thereby ensuring that your family or co-workers remain warm and safe.

After a snowstorm: When your tank is covered in snow or icicles, use a broom to clear them off. (A shovel may damage the tank.) Clear icicles from your house as well, as they can fall and cause structural damage to gutters or awnings, or even strike people.

After the storm passes and all is clear, check the entire area for downed power lines, damaged gas lines or piping, or damage to your tank. If any of these hazards exist, contact your local utility company or Kimlin Energy Services. Do not attempt repairs yourself.

Finally, remove all snow and ice from your driveway, guaranteeing a clear path to your tank so your Kimlin Energy Services delivery technician can keep your tank full -- and your home warm -- all winter.

WE'RE GOING TO THE DOGS!

And we're proud of it! Kimlin Energy Services is a longtime supporter of the Hudson Valley Animal Rescue and Sanctuary, which places abandoned and rescued cats and dogs in good homes. We're sponsoring a segment on WBPM Radio every Monday morning, where local radio personality, Bob Miller, introduces a local animal in need of a new home.

Visit 929wbpm.com/animalrescue/ for more info and adopt a furry friend.

EASY WINTER ENERGY SAVING TIPS

Get homeowner peace of mind by conducting a Kimlin Energy audit. This identifies areas of the house that can benefit from improvements that will yield long-term energy savings.

Take Advantage of Solar Heat

- Open curtains on your south-facing windows during the day, and close them at night.

Cover Drafty Windows

- In winter, block out the cold with clear plastic film on the inside of your window frames.
- Install tight-fitting, insulating drapes or shades on drafty windows.

Adjust the Temperature

- When you are home and awake, set your thermostat as low as is comfortable.
- When you are asleep or out of the house, turn your thermostat back 10° to 15° for eight hours.
- If you have a heat pump, maintain a moderate setting.

Find and Seal Leaks

- Seal the air leaks around utility cut-throughs for pipes ("plumbing penetrations"), gaps around chimneys and recessed lights in insulated ceilings. Also check unfinished spaces behind cupboards and closets.
- Ask your Kimlin rep how to go about air-sealing new and existing homes.
- Add caulk or weather-stripping to seal air leaks around leaky doors and windows

Maintain Your Heating Systems

- Schedule a Kimlin technician to service your heating system.
- For furnaces and heat pumps, replace your filter once a month or as needed. Ask your rep about maintaining furnaces or boilers and heat pumps.

Reduce Heat Loss from the Fireplace

- If not using your fireplace, keep the damper closed.
- If you never use your fireplace, plug and seal the chimney flue.
- If you use the fireplace regularly, install tempered-glass doors and a heat-air exchange system that blows warmed air back into the room.

Lower Your Water-Heating Costs

- Turn down the temperature of your water heater to the warm setting (120°F). You'll not only save energy, you'll avoid scalding your hands.

A LETTER FROM MAX

Dear Neighbors,

With the busy winter season in full affect, it seems like a great time to reflect on where this small family owned business began and how much we have grown into the company we are today. During 2017, we have seen some major changes in the landscape of fuel providers. Thousands of new customers came to Kimlin Energy Services seeking the professionalism and reliability they should expect from their fuel provider. I think during this frigid winter, where other providers have came up extremely short, we have proven that we can deliver that professionalism and reliability.

We wouldn't be able to provide this level of service without the hard work of everyone that works at Kimlin Energy Services. We would not be where we are today if it weren't for all the drivers putting long hours throughout the night, Our technicians who are available 24/7 to answer no heat calls and our Customer Service Rep's who work with each customer to ensure they have the best experience with our company. Thank you for putting in the time and hard work day in and day out. Because of you, Kimlin is growing more and more everyday.

Happy heating season!

Max Kimlin
